Copyright & Publishing : Pragma Music

**New Environment** is **BOODAMAN**'s first opus. A new exploration of electronic new trends, from big beat to Drum'n bass. Like its mentor, Norman Cook, (alias Fatboy Slim, pizzaman, freak power...), he reinvents a music, initially dedicated to dance floors, and introduces without reserve, new mix and balances between grooves and electro. In his album, **BOODAMAN** presents 15 eclectic titles : **Plastic chimic**, punctuated vocal and feminine interventions of MC Yasmine; **I feel U better**, coloured by acidulous electro sonorities; and many other titles to discover in this opus like **Millionnaire** selected by Couleur 3 and FCMA in for their swiss "electro" compilation in 2006.

**Next album in progress** : in his second opus, in progress, **Boodaman** will be surrounded by more and more musicians, more voices. He tints right now this future environment with sounds and interbreedings experiments.

### Tracks Listing

#### Album: New environment (2005)

ID	title	duration
